

Industrial Engineering Seminar Announcement

Thomas A. Furness
Professor, Industrial Engineering
Human Interface Technology Laboratory
University of Washington

“The Future of Interfaces”

Over a career of 40 years, Prof. Furness has been exploring and developing technology tools for getting bandwidth to the brain and between brains. His work has encompassed fighter cockpits, virtual reality, retinal displays, educational tools, medical simulators, pain, phobias, molecular modeling, scanning fiber endoscopes and entertainment systems. In this seminar Prof. Furness will look at current and future developments of interfaces and some of the drivers that will require them to come to pass.

Tuesday, May 6, 2008

1:30 – 2:20 p.m.

101 Loew Hall
